

MONTHLY MANAGEMENT STATUS REPORT

PROJECT NO.: C-194

PROJECT TITLE: TOBACCO FLAVOR - 1981	DATE: Dec.31, 1981
BUDGET: \$394,670	
PROJECT DESCRIPTION: A variety of flavorants will be investigated. Primarily we will deal with flavorants having tobacco taste, body and impact, but also a number of specific flavor improvers, extenders, enhancers and replacements for cigarette additives. The project will involve research, planning and execution of synthesis, followed by preliminary screening for utility. Product Development will be involved with expert panelling, and Biochemistry with initial safety evaluation. Successful evaluation by all groups would permit further testing on separate project K-414. Project Tobacco Flavor-1981 will also support applications of computers to basic flavor research and for flavorant record keeping purposes.	

PROJECT COMPONENTS	
Research, Planning, Execution of Synthesis	
Preliminary Screening	
Prod. Dev. Panelling	
Biological Evaluation	
Computer Applications	
Report Writing, Record Keeping	

Little synthesis activity this month due to other project priorities. Some progress this month in computer applications, relating to "Contour Analysis."
