INB01-02 WEEKLY REPORT

Report for week of : 8 February , 1988

STUDY WEEK: 11

WEEK OF PROMOTION: 10

1) BODY WEIGHTS: Test

Average body weight per group:
Date: 10/2/88

Group	B.W.	S.D.	Min	Max
1	39.58	1.37	37.14	41.93
2	39.14	1.55	36.33	41.88
3	40.19	1.91	36.41	43.44
4	40.33	1.89	37.54	43.85
5	40.22	1.92	37.67	44.36
6	40.54	1.51	37.74	42.81
7	42.63	1.55	40.26	45.39
8	41.88	1.87	38.93	46.07
9	39.61	1.41	37.04	42.64
10	42.22	2.11	38.21	45.43

2) CLINICAL OBSERVATIONS: One animal from group 10, testing weight was sacrificed. At necropsy no abnormal finding was observed.

3) INCIDENCE OF TUMOR BEARING ANIMALS: Please find enclosed a new type of Incidence Table for animals with tumors. In this Table will be displayed both alive TBAs (i.e. survivors with tumors) and total number of TBAs (including dead TBAs) as well as the percentage of TBAs among surviving animals and the percentage of TBAs among the total number of animals per

4) MORTALITIES: There were 3 deaths during this week, including the one mentioned in section 2 and two other animals found dead as a result of clinical toxicity. The respective incidences are given in a tabulated form in the enclosed sheets.

With best regards.

X. Foullet
