Dear Dr. Rodgman,

We received from Avoca a sample of your Tobacco Additive No. 14 which we understand you do not intend to use on your products but thought that we could sell to other interested companies.

We agree that this product performs extremely well on tobacco but since the product is not G.R.A.S. or nature identical, we plan to send it out without G.R.A.S. Certification but using the tests you have performed on this product. We understand that you have performed the Ames test, LD 50 feeding studies, and dermal irritation tests to support the use of this product.

We would like to have a copy of the results of these tests and the name of the independent laboratory that conducted them. We do not intend to use the name of R.J.R. ... essentially we shall buy this compound from you as a supplier of a raw material, and offer it on a "user beware" basis but use your testing as a back-up.

Please also send me the quantity of this product that you may have in stock and a verification of whether or not you plan to make more of this product if a market is available.

Very truly yours,

Carl H. Richter
Director of Tobacco Technology
