TAKE HIS WIFE

Last September, David Sutherland's *The Farmer's Wife* landed on PBS, kicking up controversial dust. Sutherland's moving documentary reminded viewers about the oft-forgotten plight of a dying breed: farmers in the United States. Profiling homesteader Sutherland's life as the wife of a farmer on the verge of losing his Nebraska farm, the story garnered 15,000 e-mail messages, press attention country-wide and even acknowledgment from England's Prince Edward. Between the Sutherlands' struggles to save their land and their marriage, Sutherland constructed an affecting portrait of two pieces of important Americana that often get taken for granted. More than a year after the initial airing, the Sutherlands have survived their perils, but Sutherland's *Wife* serves as a testament to those who choose to carve their existence from this country's once-bountiful land.
