

CURRICULUM VITAE

Name: LINDEMAN, Jan

Dr. J. Lindeman, M.D., Ph.D. is chief of the Department of Pathology and Research/Development at the laboratories of the Delft hospitals (SSDZ), Delft, the Netherlands.

The department of pathology of the SSDZ consists of a clinical immunology, clinical microbiology and an anatomic pathology unit. Quantitative pathology, image analysis as well as flowcytometry, is available for clinical immunologic and anatomic pathologic diagnoses. Further more there is the use of biotechnology, especially monoclonal antibodies and DNA recombinant techniques, for the diagnosis of viruses and other microbial infections.

Dr. Lindeman is appointed as a consultant for Immunology and Immunopathology at the pathological institute of the Free University in Amsterdam.
