DATE: MAY98

PROJECT NO.: B-459
PROJECT NAME: PUFF BY PUFF ANALYSIS (PPB)

PROJECT DESCRIPTION:

The principal objective is to study the impact of cigarette construction and menthol application site on the puff by puff delivery of menthol. This information will be used to improve the uniformity of the puff by puff menthol delivery and to increase the efficiency of delivery. Other project objective are 1) to compile data collected from the puff by puff analyses of market cigarettes and evaluate or determine trends or predictions based on this data, 2) to update the method to include the determinations of humectants and plasticizer and 3) to continue to analyze samples submitted by R&D personnel.
