CRC and Inbifo network connection.

Hi Willy,

As discussed during our meeting review held at CRC on the 25th of February, here-attached some network diagrams.

Related to the IP addresses, as promised, we have already reserved for both CRC and Inbifo 512 addresses (each). The ranges of available addresses for the workstation and printers are the following :

For CRC :   first available address :   10.137.24.1
             Last available address :   10.137.25.253

             Subnet mask :   255.255.254.0

             Default gateway :   10.137.25.254

For Inbifo : first available address :   10.137.26.1
             Last available address :   10.137.27.253

             Subnet mask :   255.255.254.0

             Default gateway :   10.137.27.254

When you will receive the green light from your management, I will contact Patrick Reynders to pass the order for the line and router.

I hope this will help but do not hesitate to contact me if you need more details.

Best regards.

Mauro GAMBA
